Subject: WV Chem Spill res inq follow up

Hi Steve,

I've been sending Laura a brief summary of the private citizens' inquiries I've received on the WV Charleston Chemical Spill site.

This is just to let you know that I spoke with Ex. 6 - Personal Privacy this afternoon. She called the R3 Superfund information number and I got her message via customer service.

Ex. 6 - Personal Privacy's main concern was how the 1 ppm safety standard was reached, since there are no studies on the chemical's long term affect on human health. She spoke of family health concerns and although her home is not affected, the school that her children attend is. She is keeping her kids home from school until the sampling results show zero ppm.

I wasn't able to provide information about the set standard, but I gave her a point of contact at the WV Dept of Health, Bureau of Public Health. His name is Toby Wagoner, PIO, at (304) 356-4042.

There are no follow up action items.

Call if any questions.

Thanks.

Trish.
